

Executive Nickel FCAW

Executive
FILLER METALS

A premium line of flux cored nickel alloy wires.

This premium line of flux cored wire is designed to make welding nickel alloys much easier.

Executive Nickel FCAW wires exhibit superior bead appearance and excellent slag release.

Deposition rates are significantly higher than coated electrode or solid wire.

Features great out of position weld results and produces high strength weld material with good corrosion resistance.

Executive Nickel FCAW provides outstanding performance for both joining and overlay applications.

Available in all-position in various grades including 625, 82, C-276 and more.

Executive Nickel FCAW Advantages

- Exceptionally easy to use
- Outstanding performance in both joining and overlay applications
- Available in all-position in the most sought after grades of nickel
